Apache

AWS

Grunt

Git + SVN

Jasmine

Debugging tools

DevOps

Ionic

Arduino

## Experience

### Almighty

July 2015 - Current

#### Associate Director, Technology

Responsibilities include oversight of development for all client work, maintaining and optimizing internal development workflows, employee resourcing and management tasks, and full-stack LAMP/MEAN development. Involvement in new business pitch planning and ideation as well as on-site technology support and troubleshooting. Clients include New Balance, Flexsteel, Revision Military, and 47 Brand.

### SapientNitro

May 2012 - July 2015

#### Sr. Interactive Developer L2

Architecture, estimation, and development of web applications and in-store experiences using technologies such as Backbone.js, AngularJS, and Appcelerator. Clients include Boston Red Sox, Sprint, McGraw-Hill Education, Fidelity Charitable, and Phillips. Responsible for leading internal projects, code reviews, and rapid prototyping explorations to further educate peers and clients in new technologies.

Management of offshore resources, clients, and junior developers in a global distributed system to keep projects on track and properly manage client expectations.

### Almighty

July 2010 - May 2012

#### Developer

Architecture and development of web applications, in-store, and social media experiences for clients such as New Balance, L.L. Bean, Revision Eyewear, Boston Children's Museum, and Wealth Management Systems. Management experience with junior developers to help grow internal abilities to better meet client requests.

### Tank Design

May 2010 - July 2010

#### Contract Developer

Responsible for creating a rich prototype experience for a Fortune 500 company using Adobe Flex, HTML, CSS, and Javascript technologies. Worked closely with design and experience teams to define and deliver client expectations while outlining technology dependencies and limitations.

## Education

### The New England Institute of Art

April 2010

Bachelors of Science Degree in Interactive Media Design
